

Artisan GelEfex Cat Eye Polish

Product Instructions

You will need:

- Artisan GelEfex Cat Eye Polish
- ProMaster Magnetic Stick
- Artisan GelEfex Base Coat
- Artisan GelEfex Top Coat
- Artisan Geleflex Black Knight Gel Polish
- ProMaster LED lamp
- Artisan Gel Nail Wipes
- Artisan Multi-Purpose Gel Nail Cleanser

NOTE: For best results, use this cat eye polish with other Artisan products and an LED lamp.

1. Buff and prep all the nails.
2. Apply a thin coat of Artisan GelEfex Base Coat. Cure 30-60 seconds under ProMaster LED lamp.
3. Apply a coat of Artisan GelEfex Black Knight gel polish. Cure 30-60 seconds under LED lamp.
4. Apply one layer of the requested color of Artisan GelEfex Cat Eye polish. Cure 30-60 seconds under LED lamp.
5. Apply a second coat of the Artisan GelEfex Cat Eye Polish. Don't cure.
6. Slowly move the ProMaster Magnetic Stick over the nail for 10-15 seconds to create a cat eye effect. (Note: This technique requires a few trials. If you are creating cat eye nails for the first time, practice a few trials before performing the service on a client.)
7. Cure immediately after creating the cat eye effect.
8. Apply a thin layer of Artisan GelEfex Top Coat. Cure 60 seconds under LED lamp.
9. Remove any sticky layer with with Artisan Multi-Purpose Gel Nail Cleanser and lint-free wipes.
